Autobet / Autoplay

Enables playing the game automatically for a predetermined number of tickets at the current bet configuration.

The autobet / autoplay menu is accessible through the Autobet / Autoplay button.

Autobet / Autoplay Limits

The player can set various autobet / autoplay limits:

Loss Limit – Allows you to control your combined losses by entering a numeric value that will stop the autobet function and trigger a popup message when the loss limit is reached. Calculated as follows:

$(\text{Sum of bets}) - (\text{Sum of wins}) \geq (\text{Loss Limit amount})$.

Single Win – Will stop the autobet function and a popup message will be displayed when a single win payout is \geq the “Single Win” value entered.

Win Limit – Allows you to control your combined wins by entering a numeric value that will stop the autobet function and trigger a popup message when the win limit is reached. Calculated as follows: $(\text{Sum of bets}) - (\text{Sum of wins}) \geq (\text{Win Limit amount})$.

On a Win – The autobet will stop and a popup message will appear on any win within a single bet. A free bets feature is considered as one bet for this limit setting and the autobet will only stop after all the free bets are finished.

Stop on a Feature – The autobet will stop and a popup message appear when the game reaches any feature bet, including but not limited to: free bets, bonus games and mini games, with exception to random wilds features.

When the limit's conditions are met, the autobet will stop and the relevant popup message will appear in the middle of the screen.
