

## 1. Game Overview

[#gamename#] is a common draw European roulette game. The tables have been selected for their excellent performance and reliability, giving players the serenity of playing with an authentic wheel whilst being entertained.

- The roulette wheel has 37 slots numbered 0-36. The object of the game is to predict which slot the ball will land in after the wheel/ball is spun.
- The minimum and maximum bets for the table are displayed on the Straight Up Limits section of the table (for desktop) and the Paytable (for mobile).
- Payouts are made according to the Paytable. To view the Paytable, open the Information Menu, alternatively see the Payout section below.
- When the table is closing, the UI will inform you of the remaining number of game rounds. You will then be directed to the casino lobby.

## 2. Placing Bets

- The start of a new game round is clearly indicated in the status bar that is visible within the UI. The status bar will be green and will read “PLACE YOUR BETS”. The other states of the game are “FINAL BETS” and “NO MORE BETS”
- You can point at different areas of the table to highlight the various bets.
- To place a bet, select the chip value and click either a number or a betting area on the table. Additional clicks add the required number of chips of the same value to the selected bet.
- Any bets placed that are below the minimum bet limit for the table are not valid and will not be accepted by the dealer.
- Any bets placed that are above the maximum bet limit for the table are automatically adjusted to match the maximum limit.
- When the STATUS BAR indicates “NO MORE BETS” further bets will not be accepted. The Croupier will release the roulette ball into the ball track of the spinning wheel.
- Bets are individually withdrawn from your balance as you place chips on the betting table.
- When the ball lands in a slot, the croupier and/or the UI announces the winning number, and all winning bets are paid.

## 3. Bet Types

You can place many different kinds of bets on the Roulette table. Each type of bet covers a certain range of numbers, and each type has its own payout rate. Bets that

are made on the numbered space or on the lines between them are called Inside Bets, while the bets made on the special boxes below and to the right of the numbered board are called Outside Bets.

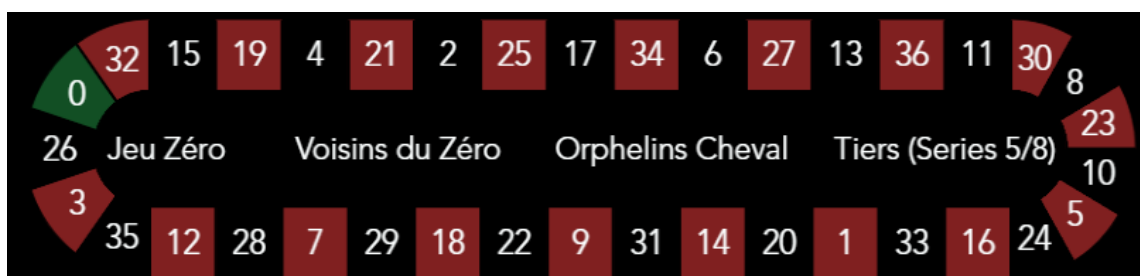

### 3.1 Inside bets

- Straight Up – place your chip directly on any single number (including zero).
- Split – place your chip on the line between any two numbers, either on the vertical or horizontal.
- Street – place your chip at the end of any row of numbers. A street bet covers three numbers.
- Corner – place your chip at the corner where four numbers meet. All four numbers are covered.
- Six Line – place your chip at the end of two rows on the intersection between them. A line bet covers all the numbers in both rows, for a total of six numbers.

### 3.2 Outside bets

- Column Bet – place your chip in one of the boxes marked “2 to 1” at the end of the column that covers all 12 numbers in that column. The zero is not covered by any column bet.
- Dozen Bet – place your chip in one of the three boxes marked “1st 12”, “2nd 12” or “3rd 12” to cover the twelve numbers above it.
- Red/Black – place your chip on the Red or Black box to cover the 18 red or black numbers. The zero is not covered by these bets.
- Even/Odd – place your chip in one of these boxes to cover the 18 even or odd numbers. The zero is not covered by these bets.
- 1-18/19-36 – place your chip on either of these boxes to cover the first or latter 18 numbers. The zero is not covered by these bets.

When you mouse over any neighbour bet or call bet on the racetrack or on the list, the boxes on the table where chips would be placed are highlighted. Simply click the bet to place your chips.

## 6. Betting functionality

## 6.1 Save layout

The save layout functions allows you to save a preferred bet or combination of different types of bets for easier placement in future rounds at any roulette table. Simply place your chips on the table and press 1 to 7 to save your bet. When a bet has been saved the number turns to Green. To place the Saved Bet, hover over the number to see the bet selection highlighted on the table then press the number to place the bet.

## 6.2 Auto-Bet (only available on desktop)

The Autobet functions lets you place bets automatically. First place your chips on the table, Press Autobet and select the number of spins that you wish to apply the bet to. You can see the number of spins remaining in the current Autobet session inside the Autobet button. To stop Autobet you press the Autobet symbol and then press the Stop button.

The Auto-bet function is not available within the jurisdiction of UK.

## 7. Bet Option Function

### 7.1 Full Complete Bet

The full complete bet function when selected allows a player to place a full complete bet on an individual number. In order to place a full complete bet the player selects a chip value, clicks on the Full Complete Button and then moves over the betting grid to see the BET visualised that will be placed. When the user clicks on a number the Full Complete BET is placed.

The following are types of Full Complete Bets offered:

A Complete Bet on a number is a set CHIP bet which consists of the following chips of betting and the placement of wagers for each betting position on a specific number:

Straight up (single number)	1
Split (two numbers)	2
Street (three numbers)	3
Corner (four numbers)	4
Six line (six numbers)	6

Example of a Full Complete Bet – in this instance on number 0

Straight up (ZERO)	1
--------------------	---

Split (ZERO/ONE)	2
Split (ZERO/TWO)	2
Split (ZERO/THREE)	2
Street (ZERO/ONE/TWO)	3
Street (ZERO/TWO/THREE)	3
Corner (ZERO/ONE/TWO/THREE)	4
TOTAL CHIPS:	17
Chip Value:	EUR 5
Total Bet:	EUR 85

Another example of Full Complete Bet applicable on 1/3 column and 2nd column.

Total chips placed 30 chips on a 1st column number (same applies to 3rd column) and 40 chips on 2nd column number.

## 7.2 Half Complete

This is a full complete bet type without street and six line bet included. It is a bet based on 25 chips.

## 7.3 Max Bet

The max button function allows you to place the maximum limit bet with one click. Select max bet and then press on your selected inside or outside bet selection on the roulette betting table.

## 7.4 Neighbour

The Bet Neighbours on Table Function allows a user to place a wager on a number and X neighbours on either side of the number (neighbours are numbers located next to the selected number on the wheel) directly on the main betting grid of the table. The total number of chips for a 1 Neighbour bet is 3. E.g. for number 9 the wager would be as follows: Straight up 9, Straight up 31 and straight up 22.

## 8. Bet On Stats

The Bet on Stats function is an alternative table layout. Instead of depicting the numbers 0-36 the table shows the hit rate for each number. The hit rate is the number of occasions that the outcome of the game has been that number based on the last X number of spins. The player is able to adjust the number of spins on which the hit rate is based. The Bet on Stats table view also show % statistics for the dozens, 1-18, 19-36, odd/even and red/black. The Bet on Stats table also show the Hot number (red boxes) and Cold numbers (Blue boxes). Betting on the table is done in the same way as the traditional table layout view. The user selects a chip and places it where he wishes to make a wager.

## 9. Game Functions
