Free Spins

3 or more Wild Scatters trigger 8 Free Spins.

At the start of Free Spins, the lowest paying symbol is chosen as an Expanding Symbol.

When enough of these Expanding Symbols land, they expand to cover all reel positions.

These symbols do not need to be adjacent to each other in order to form winning combinations.

After an Expanding Symbol expands and pays, it gets eliminated and removed from the reels for the remaining Free Spins and the next lowest paying symbol is chosen as an Expanding Symbol.

This keeps happening until only one symbol remains on the reels. At this point, there will be no Expanding Symbol and no eliminations.

Wild Scatter

The Wild Scatter symbol acts as a Wild symbol.

The Wild Scatter symbol substitutes for all symbols except the expanding symbols.

Winning symbols will be removed, remaining symbols will fall to the most possible bottom position on the reels.

A new cascade will start to fill up empty reel positions which can create additional wins.

Each cascade adds an additional row of symbols up to a maximum of 8 rows and 262144 ways to win.

Cascading will continue until no more winning combinations appear as a result of a cascade. There’s no limit to the number of cascades.

The rows are reset to 4 when a new round begins.

Wilds

Charged Wild consumes a charge when it contributes to one or more winning combinations and is removed from the reels when it consumes all charges or at the end of the round.

The Replicating Wild is persistent between cascades.

Multiplier Wild

Multiplier Wild lands with random win multipliers of 2x, 3x, 4x or 10x.

If 2 or more Wild Multiplier symbols appear in a winning combination, then the corresponding multipliers are multiplied.

General rules - The Rodfather Megaways

The Rodfather Megaways is a MEGAWAYS™ instant game with up to 200704 winning ways featuring Free Spins with Unlimited Win Multiplier, Fishin’ Time, and Mystery Symbols.

There are 6 reels and each reel can have a minimum of 2 symbols and a maximum of 7 symbols.

The number of symbols landing on each reel is selected randomly.

There is a horizontal row at the top and it always has 4 symbols and spins from right to left.

Each spin can have up to 200704 ways to win.

Changing the bet amount automatically changes the win amounts displayed in the payable, those amounts are displayed in the currency you selected.

All symbols pay from left to right on adjacent reels starting from the leftmost reel.

Wins are awarded for left to right adjacent symbol combinations of any size.

For each symbol, multiply the number of adjacent winning symbols on each of the reels to get the total number of winning ways.

Then multiply the winning ways by the payout of the winning symbol from the payable to get the total win for that symbol.

Add the total win of each winning symbol to get the combined total win.

The payout for each winning combination is equal to the value shown in the payable.

While evaluating winning combinations, each symbol on the reel is counted once regardless of its size on the reel.

Only the highest win will be paid per winning combination.

If you have more than one win on a single spin, the total amount of your winnings is added together, displayed in the win field and added to your balance.
